

Time	Day 1 - May 14, 2018						
10:00 - 12:00	KEYNOTE Dibbe Edwards, IBM; Parham Vasaiely, Jaguar Land Rover; Roger Holmberg, Ericsson						
Room	Ballsaal A	Ballsaal B	Sydney	Atlanta	Barcelona	Montreal	
12:00 - 1:00	Expo Center Lunch						
1:15 - 1:45	DCE-06 Understanding the key elements of CE/CLM deployments - Serviceability, Scalability, Availability, Authentication and more IBM, Persistent	RM-01 What's new and coming in IBM Rational DOORS Next Generation - IBM	1:00 - 1:45 pm AI-02 Using IoT and cognitive services to provide a personalized experience - HCL **NDA REQUIRED**	DEP-18 Bringing Digital Twin to life with Ansys advanced modeling and simulation - Ansys	DEP-12 ALM/PLM Integration: Connecting Product Engineering with OSLC - Sodius	DEP-15 Engineering Excellence - Method Park	
1:45 - 2:00	Q&A , Moving between sessions						
2:00 - 2:30	DCE-09 How to Secure the Crown Jewels, IBM	RM-02 DOORS 9 to DNG Migration - SyntheSys	QM-06 RQM Introduction - Persistent , IBM	DEP-13 Transforming R&D with Machine Learning - Ericsson	Model Based Engineering VoiCE	RTC VoiCE	
2:30 - 3:00	Afternoon Break						
3:00 - 3:30	DCE-05 Migrating a massive CE implementation to IBM Cloud Pt. 1- ClearObject Inc, Jaguar Land Rover	RM-11 DOORS 9 to DOORS Next Generation - tips and trips to simplify your migration - IBM	QM-04 What's New and Coming in IBM Rational Quality Manager? IBM		Model Based Engineering VoiCE	RTC VoiCE	
3:30 - 3:45	Q&A , Moving between sessions			Q&A , Moving between sessions			
3:45 - 4:15	DCE-05 Migrating a massive CE implementation to IBM Cloud Pt 2 - ClearObject Inc, Jaguar Land Rover	RM-03 How DevOps and Value Stream Integration are Transforming Car Development - Tasktop	QM-02 Achieving Computer Systems GxP Compliance with Rational Quality Manager - Ferring Pharm				
4:15 - 4:30	Q&A , Moving between sessions			Q&A , Moving between sessions			
4:30 - 5:00	DCE-03 Configuring Rational CLM deployment to authenticate via SAML IDP - IBM	RM-04 Continuous Engineering of IoT Applications Demands Secure Application Code , LDRA	QM-07 Using IBM Rational Quality Manager to meet regulatory compliance - SVA				
5:00 - 5:30	Buses to IBM Munich IoT Center						
5:30 - 9:30	Reception, Tours and demonstrations at IBM Munich IoT Center						
Track Legend	Demo \ Community \ Sponsor Track VoiCE	Change and Config Management Round Tables	Deploying CE Solution including Cloud Artificial Intelligence	Development and Engineering Best Practices	Model Based Engineering	Quality Management	

Time	Day 2 - May 15, 2018						
Room	Ballsaal A	Ballsaal B	Sydney	Atlanta	Barcelona	Montreal	
9:00 - 9:30	Mini Keynote :Transforming the systems engineering space with Watson and IoT	Mini Keynote: Digital Twin and the Engineering Lifecycle	Mini Keynote: Realizing Lean-Agile Product Development Flow using SAFe				
9:30 - 10:00							
10:00 - 10:15	Q&A , Moving between sessions						
10:15 - 10:45	DCE-04 How to setup Kerberos SSO with multiple Active Directories, WAS and CLM - IBM	RM-10 How to Start Developing Custom Widgets for DOORS Next Generation Using JavaScript, OSLC, and RM API - SmarterProcess	DEP-02 Why the IBM Continuous Engineering Solution fits for Automotive - Examples from some Customers - IBM	QM-03 Continuous Integration for HIL testing using RQM - CAF Power		WKS01 Workshop - Introduction to Model Based Testing with Rhapsody TestConductor BTC	
10:45 - 11:15	Morning Break						
11:15 - 11:45	DCE-10 RTC Cluster Testing at a Customer - IBM	RM-05 Managing Complexity using Components in DNG - IBM, Persistent	DEP-11 Building An Ecosystem Based On The Jazz Platform - Bosch	QM-01 Test Campaign handling in RQM when performing Software Development in CLM using global configurations - Bombardier	DEP-16 Make your IoT data usable with a product innovation platform - Aras		
12:00 - 1:00	Lunch						
1:15 - 1:45	MB-10 Model based development and testing of a safety critical software project - Willert	RM-06 The value of Requirements Management for EUROCONTROL Maastricht Upper Area Control Centre - EUROCONTROL	DEP-03 SAFe applied to Hardware Development using RTC - Alten Nederland	QM-05 Infosys Continuous Testing Platform - Infosys	DEP-14 The Internet of Every Thing - ClearObject	WKS02 IoT Hands-On workshop 1:00 - 1:45 PM	
1:45 - 2:00	Q&A , Moving between sessions					Wrap up / Change Sessions	
2:00 - 2:30	MB-09 Why Domain Specific Modeling is necessary to increase the development efficiency - Experiences from the automotive sector - HELLA GmbH	RM-07 Disruption Changes Everything - Requirements Management in the World of IoT - IBM	DEP-05 Reporting on configurations and components at scale - IBM	QM VoiCE	DEP-19- Realizing the Digital Thread with Rational Engineering Lifecycle Manager - IBM	LAB01 Rational Team Concert and GitLab / GitHub Integration - Lab, IBM 2PM - 2:45 PM	
2:30 - 3:00	Afternoon Break					Break/ Change Sessions	
3:00 - 3:30	MB-02 MBSE: A SysML Model of a Radar Sensor utilized in Advanced Driver Assistance Systems - Veoneer	RM-08 Want to be successful with SAFe 4.5? Start by doing what s Essential - IBM	CM-06 Next Generation Quick Planner – Tag based boards - Persistent, IBM	QM VoiCE	DEP-17 Variant Management for Complex Systems and Software: Best Practices and Solutions for Product Line Engineering (PLE) - Pure-Systems	LAB02 Distributed deployment with Liberty Profile and IBM Http Server 9 (3:00 - 4:00)	
3:30 - 3:45	Q&A , Moving between sessions						
3:45 - 4:15	MB-03 Model Driven Software Engineering for Intelligent Vehicles with Rhapsody and SysML - Intel	RM-09 Advanced reuse strategies for Doors Next Generation Pure-systems	CM-01 Advancing RTC's Software Configuration Management capabilities to meet the needs of complex development at scale - IBM, Persistent		DCE-08 Overview of the Jazz.net Rational Team Concert clustered deployment and its integration with IBM Application Performance Management for integrated monitoring - Persistent, IBM		
4:15 - 4:30	Q&A , Moving between sessions					LAB03 Refactoring projects into components with Collaborative Lifecycle Management (4:00 - 5:00)	
4:30 - 5:00	MB-05 Agile Systems Engineering - IBM	RM-12 Successfully Migrating from DOORS to DOOR Next Generation. The full story. - Persistent	CM-02 Migration Path To Enable Clustering for Rational Team Concert - IBM	DCE-01 - Challenges, Options and Approaches for Managing Multiple CLM Environment for Internal, Customer and Partner Development - Ericsson			
5:00-6:30	Expo Reception						
Track Legend	Demo \ Community \ Sponsor Track VoiCE	Change and Config Management Round Tables	Deploying CE Solution including Cloud Artificial Intelligence	Development and Engineering Best Practices	Model Based Engineering	Quality Management	

Time	Day 3 - May 16, 2018						
	Ballsaal A	Ballsaal B	Sydney	Atlanta	Barcelona	Montreal	
9:00 - 9:30	MB-04 Using Rhapsody in resource limited AUTOSAR Environments - Willert	CM-03 Introduction of LFS (Large File System) in CCM to support ClearCase migration - Siemens	DEP-08 Surround your Engineering teams to scale agile to the Enterprise, IBM	RM VoiCE	DCE-07 CE/CLM Containerization - Rethinking Deployment and Administration - Persistent, IBM	Open Lab	
9:30 - 9:45	Q&A , Moving between sessions						
9:45 - 10:15	MB-01 Integration of non-Rational tools like Matlab, MagicDraw, EA, Jira into IBM Jazz - MID GmhH	CM-04 Jazz-Community Open Source Project, What's New and Noteworthy - Siemens	DEP-09 What? You can do that now? A survey of what's new in the CE/CLM solution, IBM		Deployment VoiCE		
10:15-10:45	Morning Break						
10:45 - 11:15	MB-06 Pathing the way to the Digital Twin with MBSE - EVOCEAN	CM-05 Global configuration management: vision, progress, possible directions- IBM	DEP-10 Techniques for Reducing Reporting Downtime and Gaps in Historical Trend Reports Persistent, Siemens	RM VoiCE	Deployment VoiCE		
11:15 - 11:30	Q&A , Moving between sessions						
11:30 - 12:00	MB-07 MBSE support through Model-Based Testing and Formal Methods - BTC	CM-07 Dependency Board Technical Preview in RTC 6.0.6 - Persistent, IBM	DEP-06 Building Flexible and Effective Enterprise Report Dashboards with Jazz Reporting Service - IBM, Persistent				
12:00-1:00	Lunch						
1:15 - 1:45	MB-08 Model Based Systems Engineering – When the Requirements became runnable - IBM	Reporting VoiCE	DT VoiCE	GCIPLE VoiCE	Deployment VoiCE - Special Topic : Containers and Automation	Open Lab	
1:45 - 2:00	Q&A , Moving between sessions						
2:00 - 2:30							
2:30 - 3:00							
03:00	Conference Ends						
Track Legend	Demo \ Community \ Sponsor Track VoiCE	Change and Config Management Round Tables	Deploying CE Solution including Cloud Artificial Intelligence	Development and Engineering Best Practices	Model Based Engineering	Quality Management
